

Box Model Model (positioning, HTML, CSS)

(Individual) Students build their own box model model out of cardboard.

Time: 20 minutes

Core concept: Exactly how the box model operates.

Materials:

- Cardboard
- Markers
- Instructions

Procedure:

- Students are each given a set of cardboard and a marker.
- They are then read/shown a step-by-step instruction on making their own box model model.
- Students will label each part along the way.
- Box model model can then be used in drilling to ask what would happen in different situations
