

Newspaper Editor (HTML, hierarchy, CSS, composition)

(Small groups) Students use the language of the web to create a newspaper layout.

Time: 20 minutes

Core concept: Consolidate hierarchical thinking, using the language of the web to build structures.

Materials:

- Newspaper elements cutouts
- Pictures of completed layouts

Procedure:

- Divide students into small groups.
- Give each group a cutout set.
- Show the class a completed layout.
- Have them construct what they see with their set.
- Repeat with each layout image.
