Paper Dolls *(separation, HTML, CSS, JS)*

(Pairs) Have students customize and re-arrange paper dolls that represent types of content with different clothes and props that represent styles and actions.

Time: 15 minutes

Core concept: Separation of content, style and action.

Materials:

- Paper Dolls
- Clothes
- Props

Procedure:

- Put students into pairs.
- Give each pair a set of dolls clothes and props.
- Have one student make an arrangement.
- The other student tells a story about that content.
- The student that told the story has to use one of the previous pieces (either the doll, the clothes, or the prop the previous person used) and create a new persona for the other person to tell a story about.
- Repeat.
