Design by Committee *(CSS)*

(Individual) Students make suggestions on how to improve a page with new css rules.

Time: 10 minutes

Core concept: To show a real time example of CSS changing design.

Materials:

- Sample page

Procedure:

- The teacher loads the sample page, which is boring and plain.
- Students are asked to think about how to improve that page.
- Go around the room to each student, and accept one suggestion.
- Show them how you'd make a CSS change to implement their suggestion.
- Repeat with each student.
- When every student has had a rule implemented, the page is "designed".
