Act Like a Selector (like a boss) *(JS, jQuery)*

(Whole class) *Students use jquery selectors to select subsets of the class based on the name tags they are wearing.*

Time: 10 minutes

Core concept: How jQuery selectors work.

Materials:

- Nametags
- Action cards
- Whiteboard

Procedure:

- Each student is given a nametag with a different combination of shape, color, and letter on it.
- The teacher picks an action card and writes the selector action on the board.
- Students then must self organize into the correct group to match what's on the board.
- Repeat as needed with new cards.
